

# Quality Policy

As pioneers in advanced materials processing systems and applications, we take pride in our products, services and being recognized as a leader in the industries we serve.

We are committed to:

- Ensuring safety is first in everything we do
- Protecting our future through predictable results that build trust
- Including everyone in continuously improving the quality management system and customer loyalty
- Meeting customer and all applicable requirements

# Vision Statement

Shape Technologies Group to be the recognized leader in advanced materials processing systems and applications through the lifecycle of our products.

## Core Competencies

What we invest in to create value for our customers:

- Design and execution of high pressure technology solutions
- Process technology delivery systems and software controls
- Best in class service, applications support and aftermarket execution

# Strategy Map
